

Right side top wing

Left side top wing

Make your own Pink Underwing Moth!

1. Colour the moth's wings and body. Don't forget the pink spot!
2. Carefully cut around the outside of each piece.
3. Lay the top wings (known as forewings) on top of the underwing piece.
4. Line up the small circles on the moth's thorax and push a split pin through to fix the pieces together.

Thorax, abdomen and underwings
