

**Mooloolaba Transport Corridor
Upgrade (MTCU) Project**
Stage 1b – Walan Street, Mooloolaba

Project number: H9272

Notice to businesses and residents
Temporary water main works 16,18 & 20 Walan Street Mooloolaba
Friday 5 June and Saturday 6 June, 7am – 5pm
(weather & site conditions permitting)**Water main upgrade**

As part of the MTCU project, water supply infrastructure is being relocated and upgraded. This will ensure the water network continues to work effectively and efficiently.

A new temporary water main will be installed along Walan Street. The temporary water main must be installed now to allow other services and road works to be built around it. It will then be replaced with a permanent water main in the coming months.

To minimise inconvenience to businesses and residents, the water main works will be undertaken on Saturday 5 June between 7am and 5pm.

No interruption to water supply is expected.

In preparation for these works, some preliminary saw cutting will be undertaken along footpaths and driveways on Friday 5 June between 7am and 5pm. Property access will be maintained with traffic control in place.

Please see the map on page 2 for the location of these works.

What we are doing during these works

The temporary water main pipe will be installed in the public road corridor using a combination of underground and above ground locations. Where underground, the footpath or driveway will be cut, and a trench dug.

After the pipe is installed the trench will be infilled with a temporary surface until a permanent surface is applied later in the construction program.

Above ground locations will see the pipe installed along garden beds and shade structures. Reinstatement of these areas will also be undertaken later in the construction program.

This temporary arrangement is expected for a period of approximately six months.

Temporary changes to traffic conditions

Prior to 6am Saturday 5 June all vehicles parked within the properties of 16, 18 and 20 Walan Street must be removed. Access or egress across driveways will not be possible between 7am and 5pm.

For those residents or business who require it, alternative parking will be provided in a nearby location.

Pedestrian access will remain to residences and businesses. Temporary pedestrian footpaths will be in place as required.

What to expect during these works

Works are expected to generate low-medium level intermittent noise. Large vehicles and machinery will be on site. Traffic controllers will be in place to assist motorists and pedestrians.

Register to receive project updates

To receive regular project updates throughout the construction period, please register your contact details by emailing your details to
