Sippy Downs Drive Upgrade
Stage 4

Temporary changes to traffic conditions – University Way
Sunday 25 August to end October 2019 (weather permitting)

Major construction works for new signalised intersection
University Way - Sippy Downs Drive
Construction works are continuing in preparation for the new signalised intersection at University Way - Sippy Downs Drive.

We thank residents for your patience during the current changes to traffic conditions and wish to advise that from this Sunday evening until the end of October, traffic lanes will increase from two to three lanes. This is expected to improve traffic flow in the area.

Please see the map on page 2 to view the updated traffic conditions which include:

- 2 Northbound lanes and 1 south bound lane of vehicle traffic
- reinstatement of the right turn in and right turn out of James Cook Drive to University Way
- a reduced speed limit of 40km per hour
- works taking place over 24 hours, and up to 7 days a week

For safety reasons, traffic control will be in place along University Way and Sippy Downs Drive to assist construction workers with accessing the centre median construction areas.

The existing bus stop on University Way will remain with normal bus services in operation.

Vehicle and pedestrian access to the Chancellor Park Marketplace shopping centre, local residences and businesses will remain. Pedestrians will be redirected to alternative footpaths where required.

Night works – continuing until late December 2019
To enable the project to be completed as quickly as possible, night works will continue in/around the University Way and Sippy Downs Drive intersection until the project is complete in late December 2019.

While provision for these night works has been made for 24 hours-7 days a week, night works will decrease in frequency from next week, until mid-September. We will provide you with further information at that time about night works scheduled for the remainder of the project.

What to expect during construction?
Council acknowledges these major construction works and temporary traffic arrangements may result in some traffic delays.

We ask for your patience and request that you allow an extra 10-15 minutes' travel time as a precaution.

Signage will be in place to help direct motorists and pedestrians.

Intermittent, medium level construction noise can be expected during the day and night, including the operation of machinery and large vehicle movements.

The project team will try to minimise the construction impacts wherever safe and practical to do so.
