Sippy Downs Drive Upgrade
Stage 4

Temporary changes to traffic conditions –
Sippy Downs Drive Service Road entry and exit points
Sunday night 15 September to late December 2019 (weather permitting)

Changes to Service Road entry/exit
The Sippy Downs Drive Upgrade project remains on schedule for completion by late December 2019.

To enable the upgrading of the existing two lanes of Sippy Downs Drive, some temporary changes to traffic conditions will apply to the Service Road.

From the evening of Sunday 15 September until the project is completed in late December –

- no right turn access will be available to/from Sippy Downs Drive to/from the Service Road
- entry will be left in only from the Eastern end of the Service Road (near Siena College).
- exit will be left out only from the Western end of the Service Road (near roundabout/new intersection).
- the central access point of the Service Road will be temporarily closed to all traffic.

Signage will be in place to help redirect motorists.

Please see the map on page 2 to view the updated traffic conditions.

Night works – continuing until late December 2019
Night works will continue in/around the University Way and Sippy Downs Drive intersection until the project is completed in late December 2019. Provision has been made for 24 hours - 7 days a week night works to complete the project as quickly and safely as possible.

What to expect during construction?
Council acknowledges these major construction works and temporary traffic arrangements may result in some traffic delays. We request that you allow an extra 10-15 minutes' travel time as a precaution.

Signage will be in place to help direct motorists and pedestrians.

Intermittent, medium level construction noise can be expected during the day and night, including the operation of large machinery and heavy vehicle movements.

The project team will try to minimise the construction impacts wherever safe and practical to do so.
