

## Introduction

This document (Part C) forms part of the Environment and Liveability Strategy (the strategy), which is made up of:

- **Part A:** Strategic Directions
- **Part B:** Five-Year Implementation Plan
- **Part C:** Network Plan.

The purpose of Part C is to provide planning direction and technical detail to assist with the implementation of the strategic directions and the delivery of integrated on-ground outcomes associated with the applicable themes listed below from Part A (*Table 1*), thereby ensuring that investments are undertaken in an effective and sustainable manner.

Part C contains the Desired Standards of Service and Network Blueprints for Sunshine Coast Council (council) owned and controlled assets/infrastructure and for the networks council is responsible for managing.

- The **Desired Standards of Service** (DSS) provide the technical standards and specifications to inform the planning, development and management of council owned and controlled assets/infrastructure and networks for which there is a management obligation.
- The **Network Blueprints** contain maps and descriptions to guide the geographical planning for the land and facilities we currently have, and what is required to service future needs.

It is intended that Part C will be updated to incorporate further information and additional DSS for relevant themes not yet addressed and identified in the strategy's implementation plan.
